More about Prayer Locations

Welcome!

Welcome to the WherePrayer™ User Guide!

WherePrayer™ is an app that lets you send virtual prayer postcards to any location in the world. You may find that the WherePrayer™ interface is familiar because it mimics the Mail interface. WherePrayer™ is “Mail for Prayers.”

The WherePrayer™ app can be used on your iPad as well as iPhones and compatible iPods. When there is a significant, perhaps confusing, difference between the user interface for the iPad, we have added some hopefully-helpful images and guidance.

Still on iOS 11?

Warning: You may experience crashing when viewing maps in the WherePrayer™ app. This appears due to a bug in Apple's iOS 11 code, and users report that updating to iOS 12 eliminates the problem. If you haven't yet updated your device, please consider doing so. It only takes a few minutes, and you will also be able to take advantage of improved performance and new features.

A Tour

When you open the WherePrayer™ app, you will first see the splash screen pictured below.

Fig. UG-00

Navigation and Controls

Notice the icons at the bottom of the screen. To get around in WherePrayer™, tap these icons. The sections below walk you through each of these icons, and what lies within.

Fig. UG-01

For iPad users

In place of the **More** icon, you will find the **About** and **Credits** icons. On the more compact display of the iPhone and iPod touch these are nested under **More.**

The Map Tab

1 Tapping on the **Map** icon will bring up the **Map** tab, which is the default screen when you open the app. The **Map** tab shows two options for viewing the locations currently held in prayer by WherePrayer™ users.

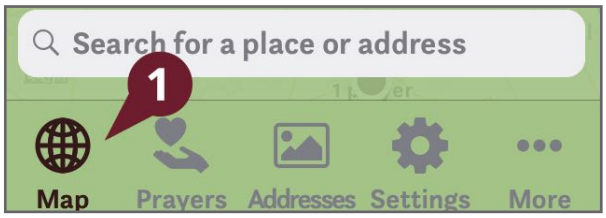

Fig. UG-02a

2 You can toggle between **World** or **Mine** at the top of the **Map** screen (white text indicates the current setting.) World shows all the location tags for all active prayer postcards.

All prayers within 2.5 kilometers (km) of each other are aggregated into a single public prayer

but will display separately in the **Mine** view if they are yours. If the public prayer is yours, it will also display in its exact location on both tabs.

Mine shows your own active and expired prayer postcards. The location tags appear in red when active — bright red to start and gradually getting darker (maroon) as they expire. The tags turn black when expired; they are displayed in gray if they are in the **Trash** folder.

3 Tap the **Info** icon to open an overlay dialog box with several different options.

Fig. UG-02b

[For more about prayer locations, click here.]

Use Apple's functionality for moving around the map. Move your finger gently over the screen to shift the view. Pinch your fingers together to zoom out, or spread your fingers apart to zoom in.

4 Toggle between the **Map** view and **Satellite** view to see either the geographical map or the satellite image, respectively.

5 Toggle on or off **Points of Interest** to show or hide common points of interest such as parks, schools, museums, and restaurants.

6 Toggle on or off **Search** to show or hide a Search bar so you can search for a location by name. You can type in an address or a Point of

Interest, and select from search results.

7 You can add a location pin to the center of the current view by tapping **Add a Pin** (map middle). If you don’t get the pin in the exact spot, click **Remove Pin.** Then zoom in and drag the map to center the desired location in the view window. Repeat these steps until you get the pin just right.

To reveal the Prayers sidebar, tap on < Prayers in the upper left corner of your screen.

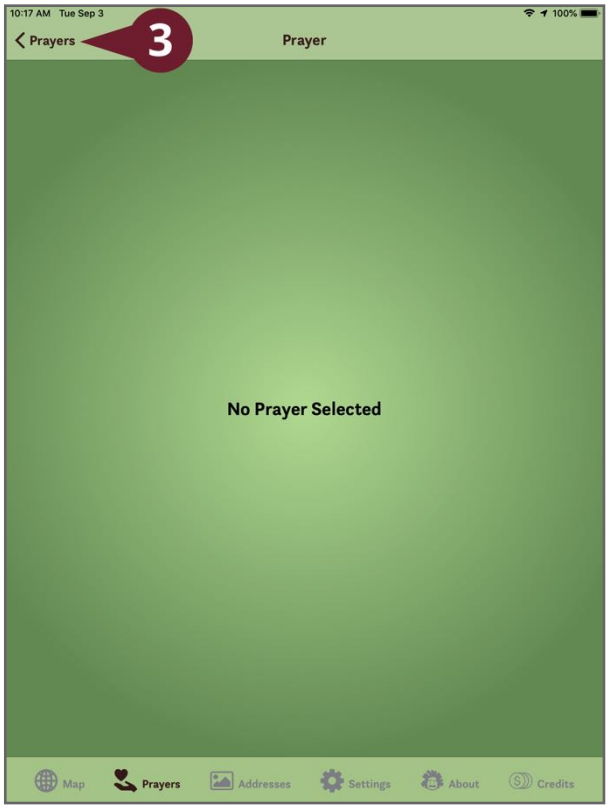

Fig. UG-03c/QSG-06c

4 To create a prayer postcard, find the + icon (plus sign) at the upper right of the sidebar and tap.

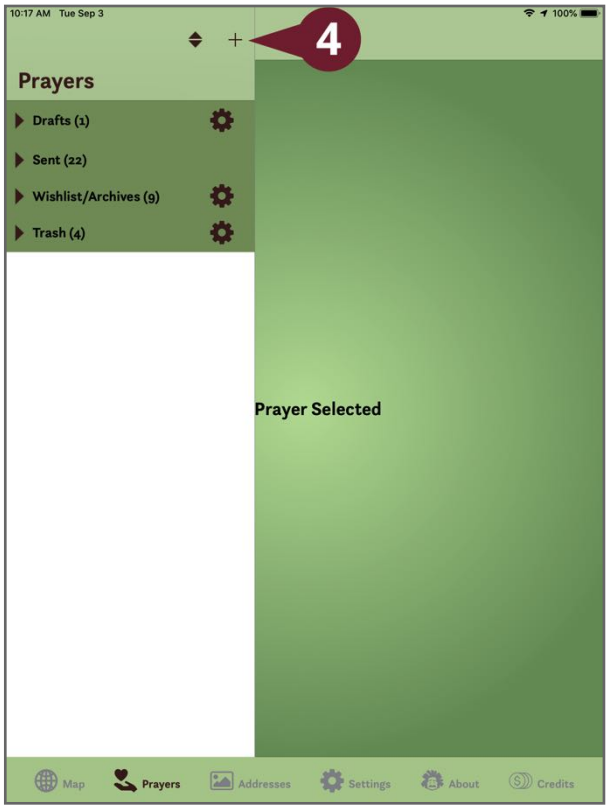

Fig. UG-03d/QSG-06d

[Read more about creating and sending a prayer postcard here.]

The **Prayers** tab is also where you can access

the prayer postcards that you create.

You can also organize your prayer postcards, either by swiping each left or right to reveal action icons, or by tapping the prayer to open it and then act on it from there.

Read more about organizing with swipes here.
Read more about opening prayer postcards here.

Folders by Category

As you create prayer postcards, they are automatically organized into folders by category according to their status. You can find them in the folders labeled **Drafts, Sent, Wishlist/ Archives** and **Trash.** You will see these category labels on a medium green colored background.

1 The **Drafts** category is the default folder where you will find Prayers which you have **Saved** but have not sent. Tap on the green label to reveal your **Draft** prayer postcards. The number of prayer postcards in the **Drafts** folder is in parenthesis, in this case zero (0).

2 The **Sent** category is where you will find prayer postcards which have been sent. The number of prayer postcards in the **Sent** folder is parenthesis, in this case two-hundred and sixteen (216).

3 Within the **Sent** section, there are two sub-categories, **Active** and **Expired.** You can expand or hide these sections by tapping anywhere on the green area labeled **Sent.** The **Active** and **Expired** sub-categories are displayed on a

lavender background. When you send a prayer postcard, it is active for one day (24 hours) for four credits. After one day, it will be automatically expire and can be found in the **Expired** folder.

Within the **Wishlist/Archives** category, there is a sub-category called **Sample Prayers.** Expand or hide this section by tapping anywhere on the green area labeled **Wishlist/Archives.** The number of prayer postcards in the **Wishlist/ Archives** folder is in parenthesis, in this case forty (40) — not the number of **Wishlists.**

The **Sample Prayers** sub-category is displayed on a lavender background. Under **Sample Prayers**, you can view four sample prayers which come with WherePrayer™. (If they are in your way, they can be moved to **Trash**, and then

Deleted from Trash. Change your mind? — they can be reloaded later.)

Find out how to restore Sample Prayers in the Settings tab.

To organize your prayer postcards, you may create one or more **Wishlists** of your own. To do this, tap the **Gear** icon on the right side of the green area where you will find **New Wishlist.**

Read more about Gears in the Prayers tab here.

Initially, there won't be anything in the **Trash** category. When you **Delete** a prayer postcard, it will initially move to **Trash** and then can be deleted permanently, individually from within the **Trash** folder. Alternatively, delete everything in **Trash** by tapping on the **Gear** icon to the right

side of the green area. The number of prayer postcards in the **Trash** is in parenthesis, in this case two (2).
0
[Read more about Gears in the Prayers tab here.]

6 The up/down arrow icon is a toggle. Tap this icon once to hide all except the top folders. Tap again to expand all folders, revealing what is inside.

7 You can **Search Prayers** using the search bar. Type in text and your prayer postcards which contain that text in any field will be listed. (If you don't see **Search Prayers**, pull down from the top of the screen. However, pull down A LOT and it will reload all your prayer postcards with images, which may take some time depending on if you have a lot of prayer postcards.)

About Gears

Get your Prayers in Gear!

There's a lot going on in the **Prayers** tab! In addition to expanding or contracting categories like an accordion, you will notice **Gear** icons to the right of every green category and lavender sub-category label. Tap on a gear and it will give you several options:

Drafts

Tap the gear to Sort A-Z, Sort Z-A, or Move all to **Trash.**

Active

Sort by sent: Most recent first, Most recent last; Sort by expiration: Soonest first, Soonest last.

Expired

Sort by expiration, most recently expired first or last, or Move all to Trash.

Wishlist/Archives

Sort by name A-Z or Z-A, or create a New **Wishlist.**

Sample Prayers

(and any **Wishlist** you create) Sort by subject, A-Z or Z-A, **Rename Wishlist, Delete Wishlist. Trash:** Sort by subject, A-Z, Z-A, **Empty Trash** (if there are items in **Trash**).

About Swipes

Get Organized Faster with a Swipe!

Manage **Prayers** and **Addresses** more efficiently by swiping left or right.

Prayers

Drafts

Swipe Right, then tap on the **Send** icon to **Send.**
Swipe Left, then tap to **Copy, Move,** or send to **Trash.**

Sent (Active)

Swipe Right, then tap to Extend Time.Swipe Left, then tap on the **Copy** icon to copy.

Sent (Expired)

Swipe Right, then tap on **Resend** to resend.
Swipe Left, then tap Move to move the prayer to **Draft** status or a **Wishlist.** Or, tap on **Trash** to move to trash.

Wishlist prayers

Swipe Right, then tap the **Send** icon to **Send.**
Swipe Left, then tap to **Copy, Move,** or **Trash.**

Trash

Swipe Left, then tap to **Move to Drafts** or **Wishlist,** or **Delete.**

Addresses

Swipe Right, then tap to add a **New Prayer** at that location.
Swipe Left, then tap to move the address to **Trash.**

The Addresses Tab

1 Tapping on the **Addresses** icon will take you to the **Addresses** tab.

The **Addresses** tab lets you keep frequently used prayer locations in a list for easy access.

The **Addresses** list view is a sorted list, by address name, showing you the name, address, any keywords you associated with this address, and a map image of the location.

Fig. UG-04a

For iPad users

2 To reveal the **Prayers** sidebar, tap on < Addresses in the upper left corner of your screen.

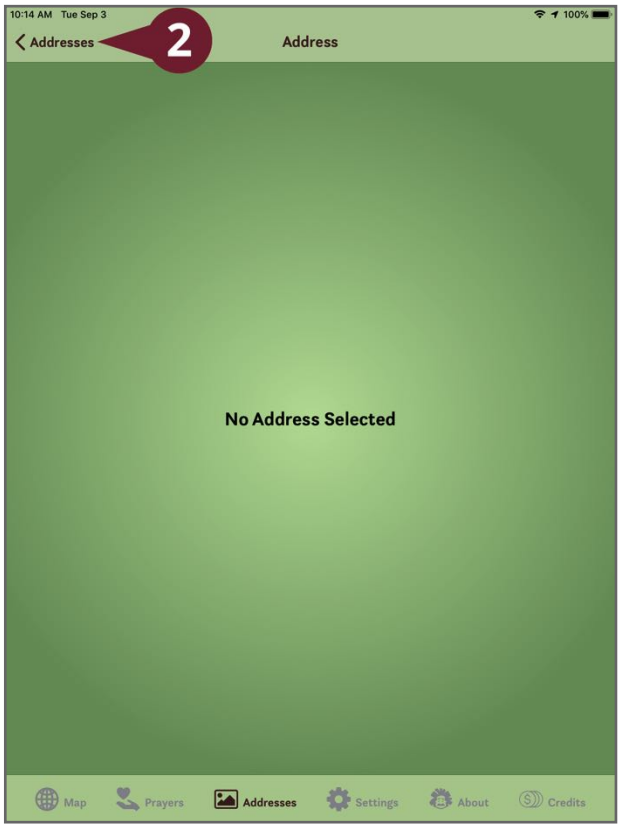

Fig. UG-04b

3 You can add an **Address** by tapping on the plus sign at the top right of the screen. On the iPad, locate the + icon (plus sign) at the upper right of the sidebar.

4 Search for an address using the **Search Bar** at the top. (To reveal the Search bar, you may need to swipe down on the **Addresses** screen.)

Type in text which might appear in the **Name**, **Address**, or **Keywords** associated with that address to filter results.

5 There is an index bar along the right hand side that allows you to jump directly to that section in the list. Use this to scroll up and down quickly.

This list also supports **Pull-To-Refresh** by continuing to pull the list down. This action will reload all your addresses from iCloud. This action should rarely be necessary since WherePrayer™ does a good job of keeping your device up-to-date with what is on iCloud.

Addresses, like **Prayers**, can be acted on with a swipe.

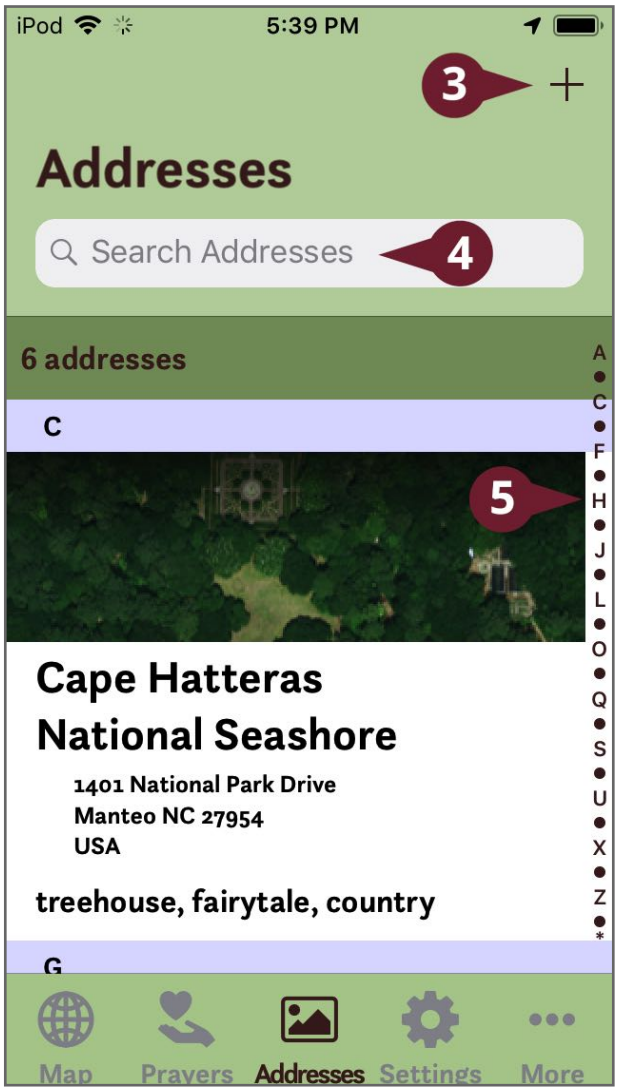

Fig. UG-04c

6 Swipe Right, then tap to add a **New Prayer** at that location.

Swipe Left, then tap to move the address to Trash.

You can also tap on an address to open it.

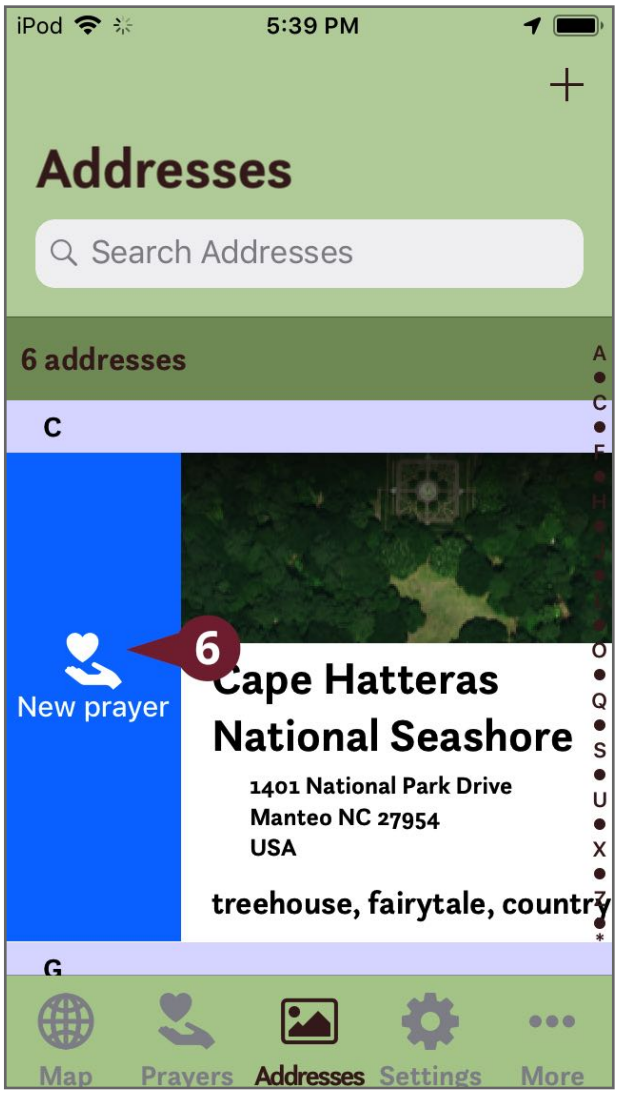

Fig. UG-04d

7 From there, you can tap on the **Edit** icon to edit (change name, keywords, or location); don't forget to tap **Save** to preserve changes.

You can also view the location by tapping on the map image, or move the address to **Trash** by tapping on the **Trash** icon.

Fig. UG-04e

The Settings Tab

1 Settings Icon

Tapping on the **Settings** icon (gear) will take you to the **Settings** tab.

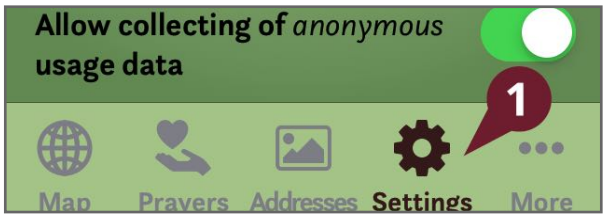

Fig UG-05a

The **Settings** tab contains various options that you can configure and actions you can perform.

2 Relative Dates

This setting configures how you want **Active/ Expired Prayer** dates to appear. The default is **Off**, which displays full dates including day of the week, month, day, year, and time. When

Relative Dates is switched On, the date will be displayed as “Today, Tomorrow, etc.”, with the time.

3 Name Field of New Addresses from Prayers

This can be set to Location Name or Prayer Subject. When you create an address from a prayer, the address name will either be the location name or prayer subject depending upon this setting.

4 Reload World Prayers

WherePrayer™ does its best to keep your device updated with the latest active prayers around the world. If the **World Prayers** don’t seem to be refreshing regularly, then tap this button to refresh the prayer locations on the **World Map.**

5 Restore Sample Prayers & Sample Addresses

If you have deleted the Sample Prayers and would like to reload them, tap Restore Sample Prayers & Sample Addresses.

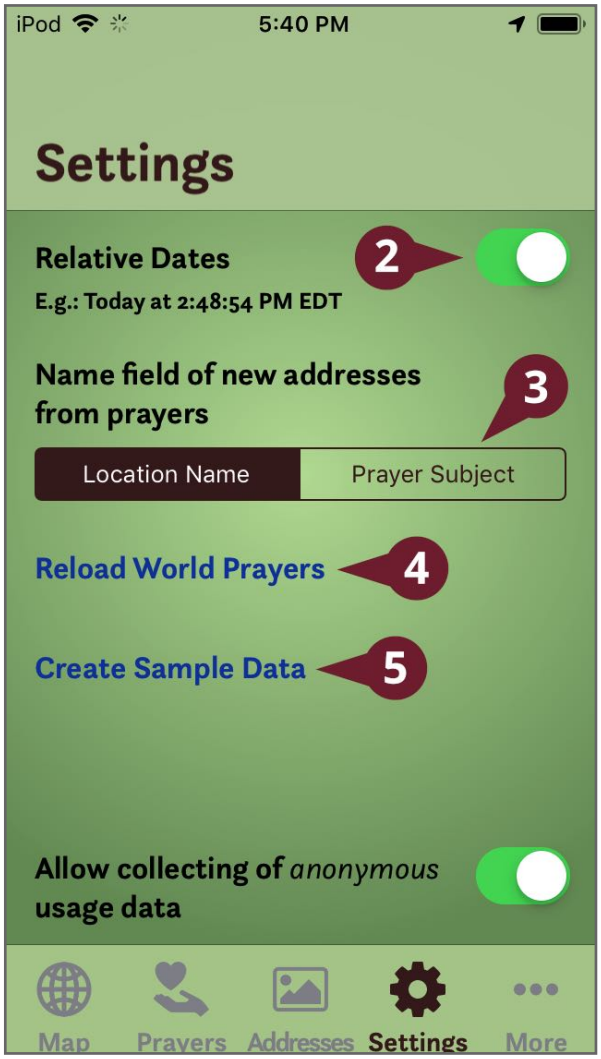

Fig UG-05b

6 Allow Collecting of Anonymous Usage Data

Keeping this toggled to On will allow WherePrayer™ to view aggregated usage data in order to improve the app functionality and responsiveness.

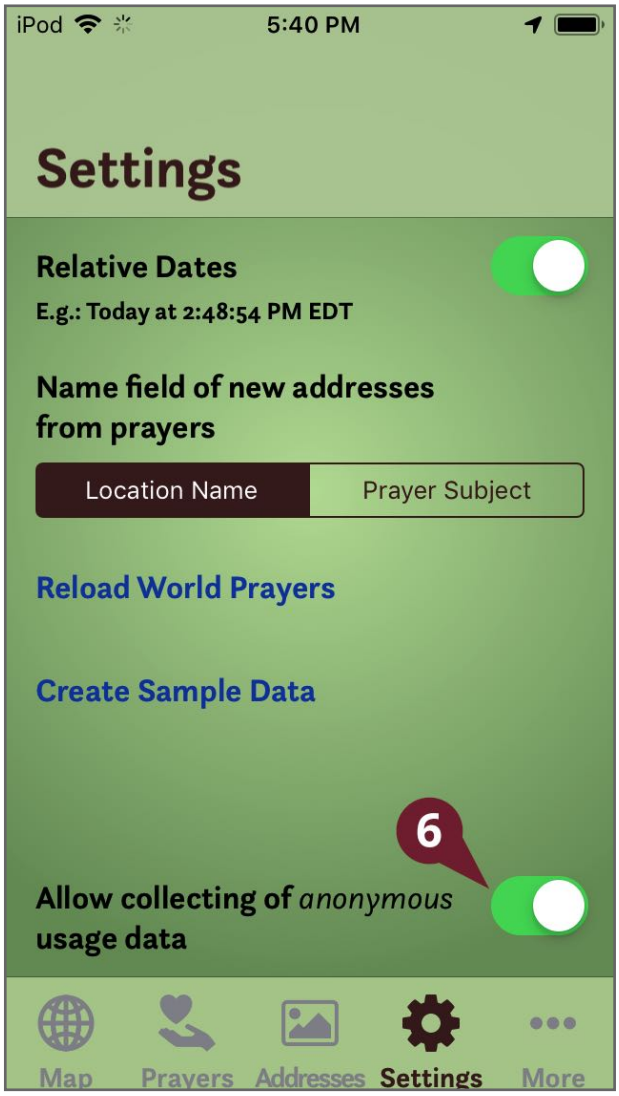

Fig UG-05c

Regardless of the setting you choose, except for youself, no one can view contents of your prayers or see your activity within the app.

For more information, view the Privacy Statement found on the About section under the More tab; click here for instructions.

If you wish to opt out of all anonymous reporting, set this toggle to Off.

The More Tab (About and Credits)

1 For iPhone and iPod touch users:

Tapping on the **More** icon will take you to the **More** tab.

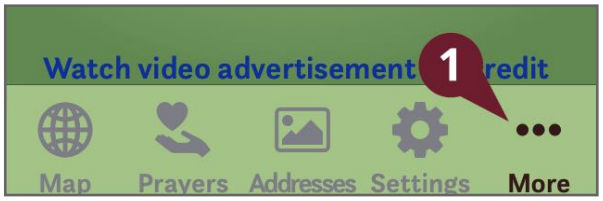

Fig. UG-06a

On this tab, you will see icons for:

Acknowledgments

Read acknowledgements of third party contributions to the app.

Report a Problem

Contact the Support team with any questions or issues.

Suggest [an] Improvement

Send the WherePrayer™ team your thoughts about the app.

Credits

Tap **Credits** to view the number of **Credits** you have remaining. From this screen, you can also **Buy Credits** or **Watch a Video Ad** to earn credits. For more about Credits, click here.

The Credits Tab (iPad users)

On the iPad, there is more room on the screen and the **Credits** icon is arranged along the bottom with icons for the other tabs instead of being nested under **More**.

Tap **Credits** to view the number of Credits you have remaining. From this screen, you can also **Buy Credits** or **Watch a Video Ad** to earn credits.

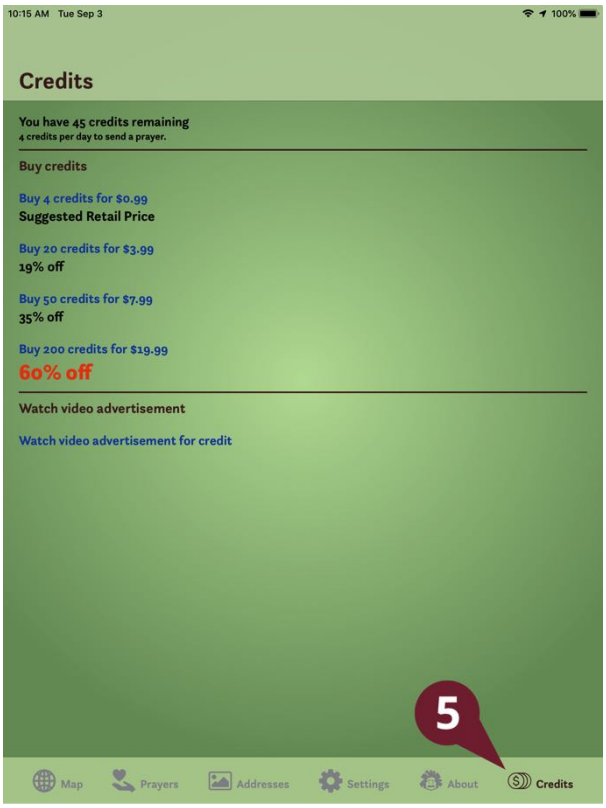

Fig. UG-06d

[For more about Credits, click here.]

Anatomy of a WherePrayer™ Prayer

In WherePrayer™, Prayers are in the form of virtual postcards, also known as prayer postcards. You may view postcards that you create, and others can view them if you share them.

Each WherePrayer™ prayer consists of:

1. Subject (optional)
2. Text (optional)
3. Location (required)

Fig. QSG-05a/UG-07a

Click **Show on map** to show the prayer location on the map.

If you swipe across a prayer postcard horizontally, it will flip and show the image on the reverse. By default, the image will be the satellite map image from Apple Maps for the

location. You may replace this with your own image.

4 Postcard Image (optional)

Fig. QSG-05b /UG-07b

The postmark on your prayer postcard shows the date and time it was sent. The stamp

contains how many credits were used to send the prayer, and the number is in red for expired prayers. You can tap on the stamp to send, resend, or extend the time on a prayer.

For iPad users

On the iPad, all the prayer postcard elements can be viewed on one screen.

Each WherePrayer™ prayer consists of:

1. Subject (optional)
2. Text (optional)
3. Location (required)
4. Postcard Image (optional)

Fig. QSG-05c/UG-07c

WherePrayer™ Actions

WherePrayer™ lets you send virtual prayer postcards to locations all over the world, and share them. Now that you have taken the tour of the WherePrayer™ navigation and controls, it's time to delve into the functions of the app.

[How to Send a Prayer Postcard.]
[How to Share Prayer Postcards.]
[How to Organize Prayer Postcards.]

How to Send a Prayer Postcard

There are several ways to go about sending a prayer postcard.

1 You can select a Map location, and then tap **Add Prayer.**

Fig. UG-08a

2 You can select an **Address** from the **Addresses** tab and then swipe left and tap on **New Prayer.**

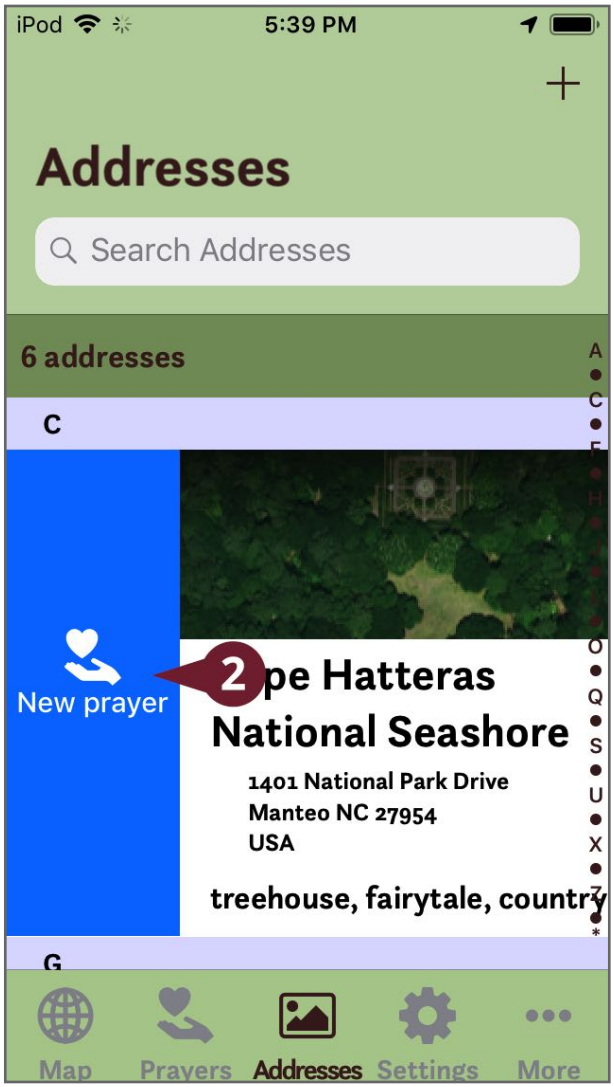

Fig. UG-08b

For iPad users

Open the **Addresses** sidebar by tapping on **< Addresses** at the top left of the screen.

3 You can select an **Address** from the **Addresses tab** and tap on the address to open it. Then tap on the **New Prayer** icon.

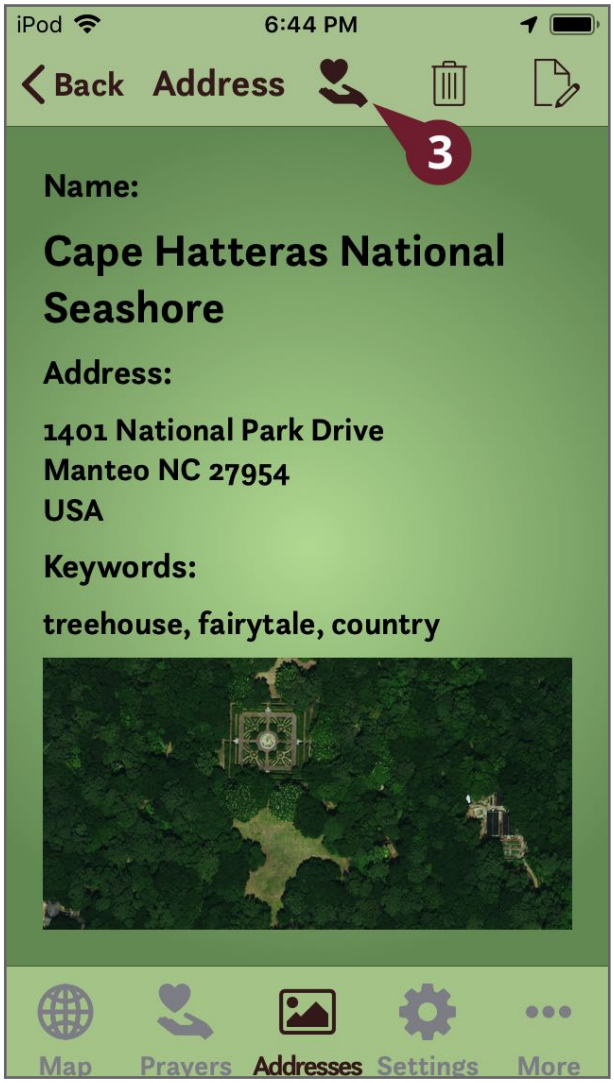

Fig. UG-08c

4 Perhaps the most straightforward way to send a prayer postcard is to navigate to the **Prayer** tab. Then, tap on the + icon (plus sign) in the upper right of the screen.

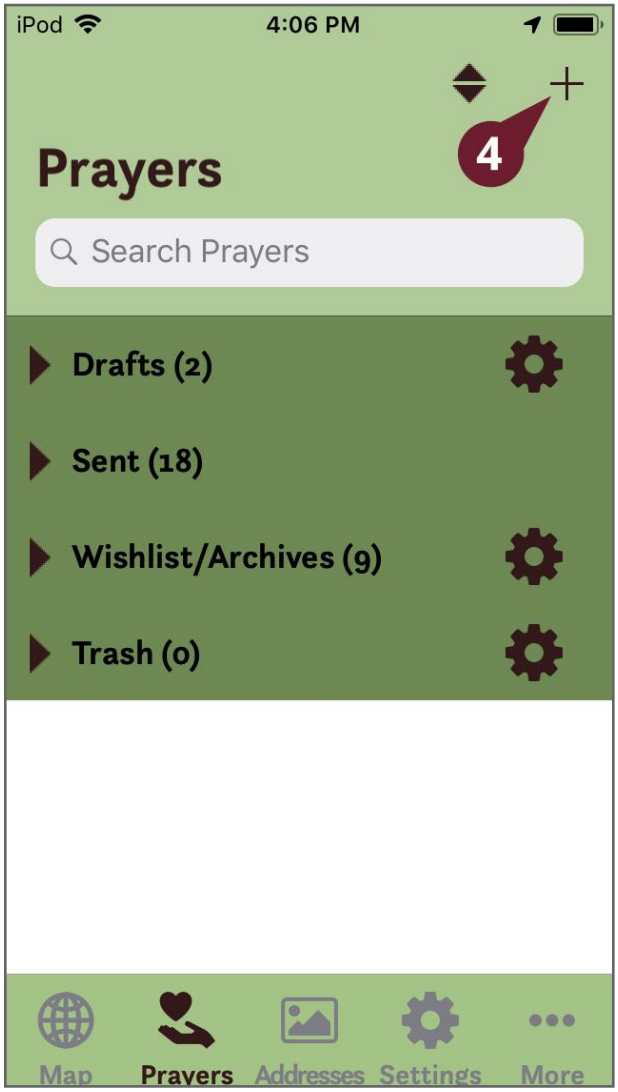

Fig. UG-08d

For iPad users

Open the Prayers sidebar by tapping on **< Prayers** at the top left of the screen.

Each prayer in WherePrayer™ needs a Location.

To set the prayer **Location**, either:

1. Tap **“Tap to select”** to select a location from the **Map**. Drag the map so that the desired location is under the location tag.

Or use the **Search** bar under the map to search for the location name.

-or-

2. Tap **“Select from map”** to initiate the same functionality.

-or-

3 Tap “**Select from Addresses**” to select the location from your saved **Addresses.**

-or-

4 Tap “**Select from Contacts**” to select an address from your personal iPhone/iPad Contacts.

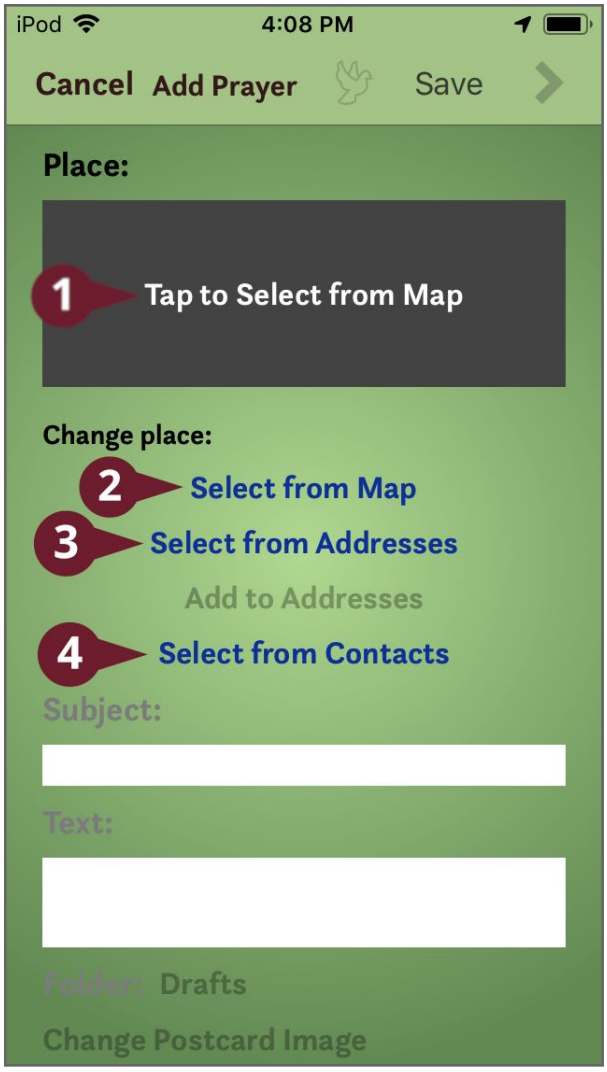

Fig QSG-07a/UG-09a

5 Tap Done to set the Location.

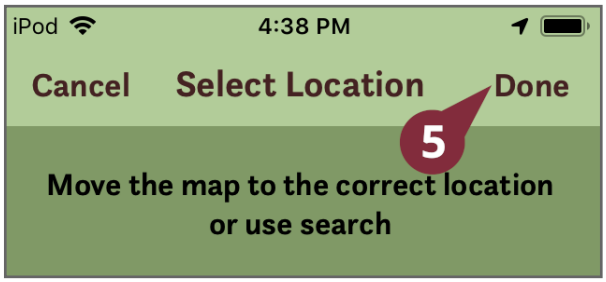

Fig. QSG-07b/UG-09b

For iPad users

All these elements will be displayed on a pop-up dialog box. They are arranged slightly differently (in columns) but should be easy to find, so a separate image isn't provided.

1 If you like, enter text into the **Subject:** text box.

2 If you prefer, enter text into the **Text:** text box.

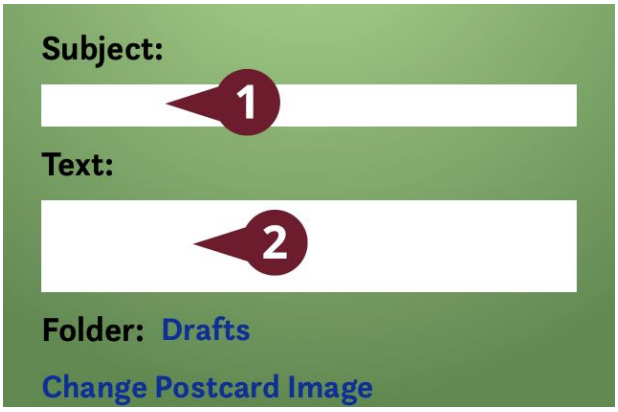

Fig. QSG-08a/UG-10a

Note: If you are copying and pasting text from one field to the other, use Apple's Select All functionality, then Copy. Click twice in the destination field. You will see options Select, Select All, Paste, BIU (Bold, Italic, Underline), and Paste Text Only. If you choose Apple's "default" paste, you get a minuscule, nearly invisible font size.

3 If you **Paste Text Only,** the pasted text will be the same size and weight as the other text.

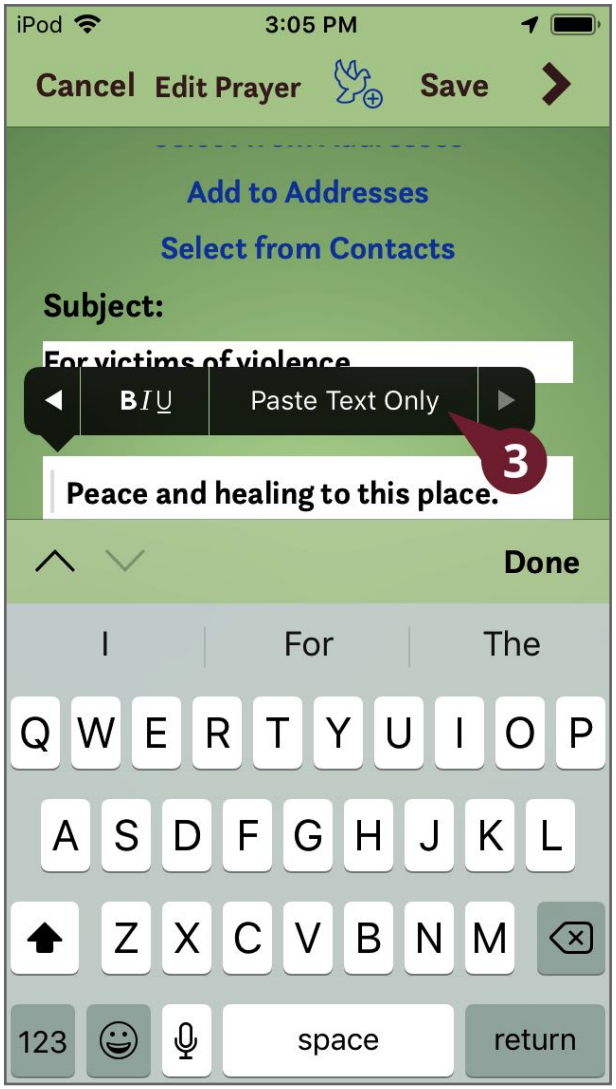

Fig. QSG 08b/UG-10b

By default, your postcard Prayer will include the satellite image from the Map as the Postcard Image.

4 You can optionally add a different Postcard Image for the back side of your Prayer postcard.

To add your own image, tap on the > icon (greater than sign).

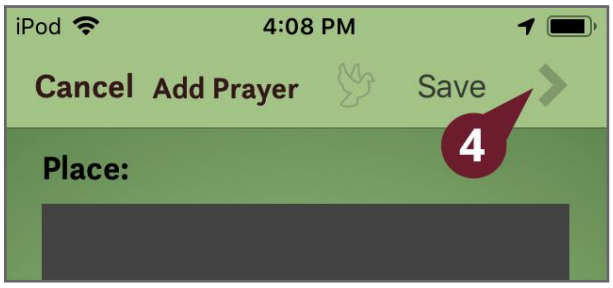

Fig. QSG-08c/UG-10c

To add a Postcard Image, tap the gray box labeled **“Tap to select or long press to paste a copied image.”**

iPad users

The gray box will be labeled “Tap to select or drop an image” but the functionality is the same.

Fig. QSG-09a/UG-11a

You will have several options to choose from for selecting your Postcard Image.

You can take a photo with your Camera.

You can use a saved image on your device from its Photo Library.

You can use a saved image on your device from a Saved Photos Album.

If you have an image in your clipboard, you can **Paste** the image with a long press.

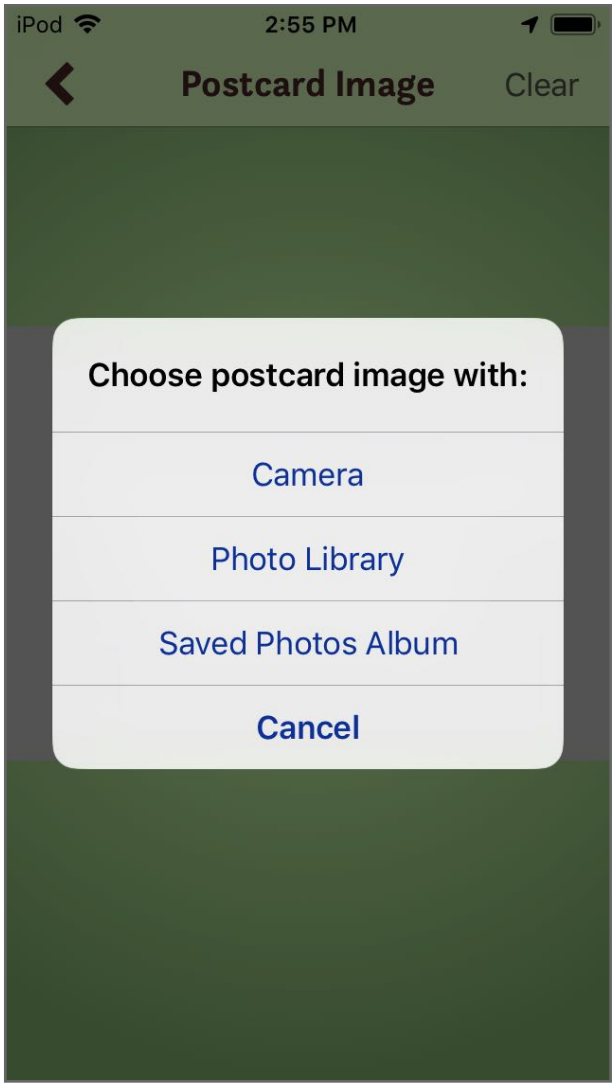

Fig. QSG-09b/UG-11b

Note: To use your camera for the Postcard Image, you need to allow WherePrayer™ to use the camera. A pop-up dialog box will request permission; otherwise you can authorize permission in Settings > WherePrayer™ > Camera. Then you will be able to take a picture to use as the image for your postcard.

You can copy both **Map** and **Prayer** images with a long press (on the phone) or by using drag and drop (on the pad). Tapping on the map image brings up a map view of that location.

To **Adjust Image,** drag the image to position it within the window.

1. To increase the speed of loading the image later, toggle on **Save low-res image** (low resolution).

2. When the Postcard Image is adjusted to your liking, tap **Done.**

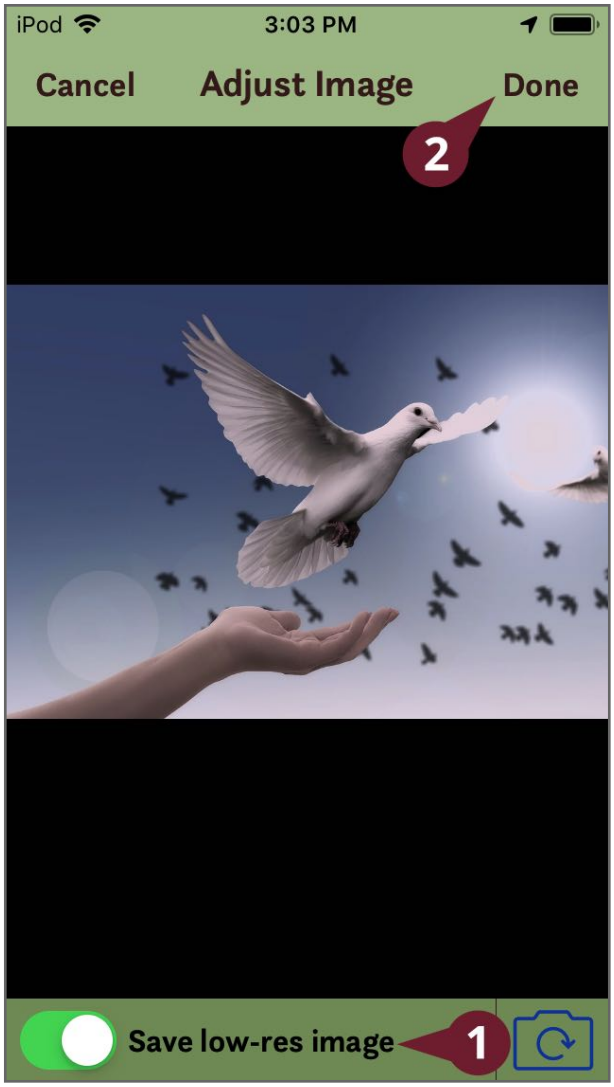

Fig. QSG-10a/UG-12a

3 If you are not happy with the Postcard Image and want to try again, tap **Clear.**

4 When the **Postcard Image** is as you like it, tap the < icon (less than sign).

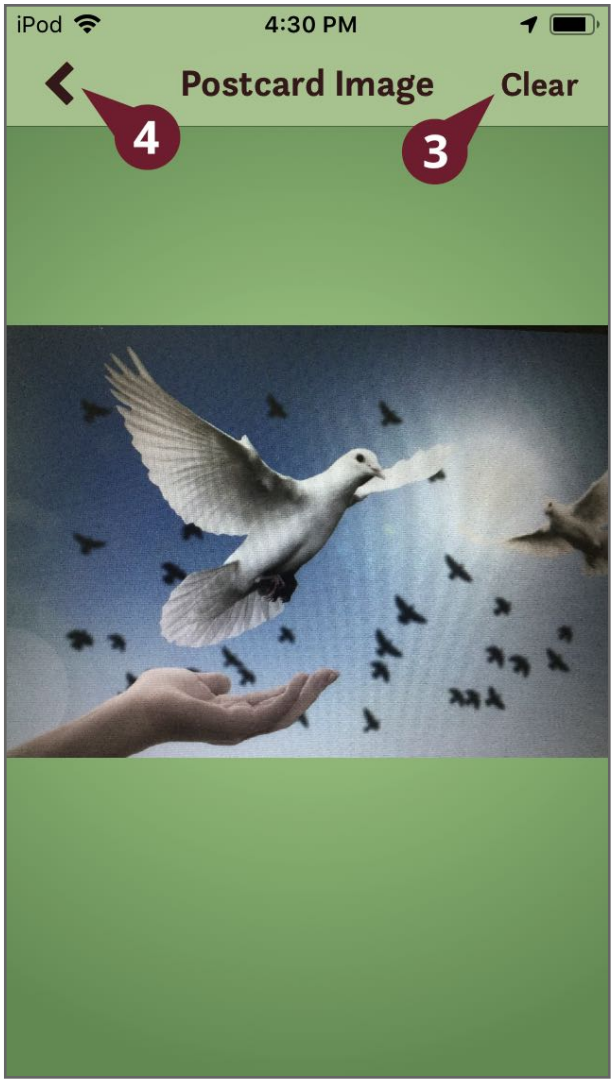

Fig. QSG-10b/UG-12b

For iPad users

All these elements will be displayed on a pop-up dialog box. They should be easy to find, so a separate image isn't provided here.

1 To Save the Prayer, tap **Save.**

Fig. QSG-11a/UG-13a

You will be able to either:

- Save & Send
- Save Only (You will be able to find in Drafts)
- Cancel

Another way to **Send** is to tap on the **Dove** icon.

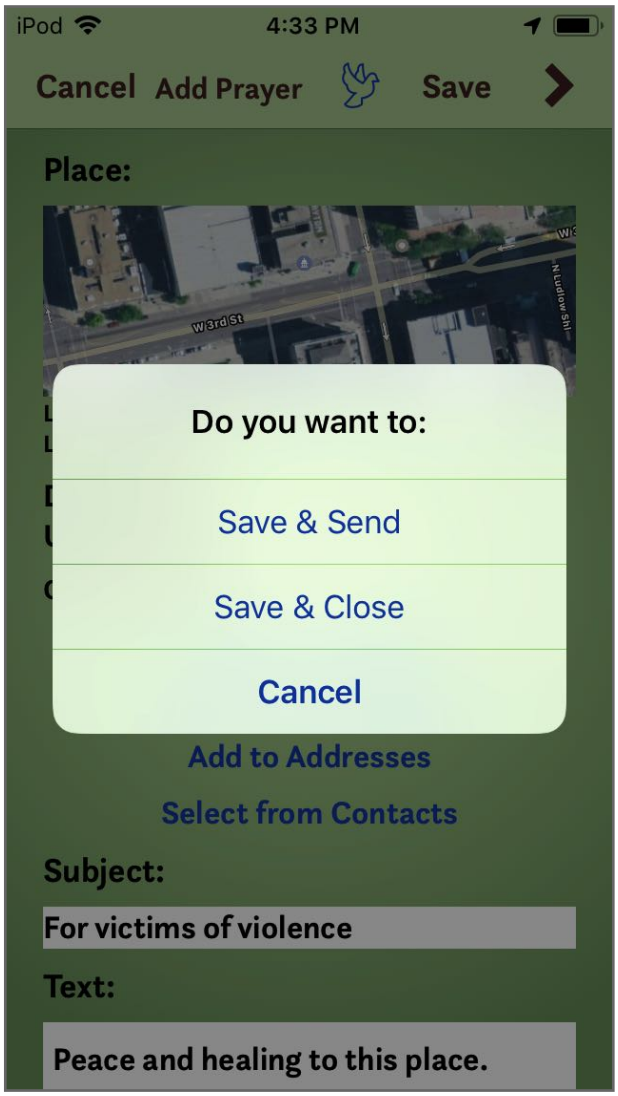

Fig. QSG-11b/UG-13b

If you save only, by default your prayer will be saved in the **Drafts** folder. To change this, tap on **Drafts** and select a different folder before saving. Alternately, the prayer can be moved from the **Drafts** folder to another folder by swiping left and tapping **Move**, or by opening the prayer and tapping the **Move** icon. On the iPhone and iPod touch, the **Move** icon is nested under the **Gear** icon.

After you tap **Save and Send** or tap on the **Dove** icon, you will arrive at the **Send Prayer** screen.

Sending a prayer requires four credits for each day the prayer is Active. To get started, new WherePrayer™ users begin with a supply of free credits.

1 If you have a balance of four or more credits, you can **Send Prayer.**

Note: Once you Send a prayer postcard, it cannot be retrieved or undone. You cannot change the location — the location is fixed until the prayer expires. However, you can, anytime, change your mind about the text and image of a prayer postcard, even while active.

2 When you have used up your initial supply of credits, you will need to acquire more. One way is to **Buy credits.**

You may buy credits from this screen. The more credits purchased at one time, the lower the cost per credit. You may be asked to log in with your Apple ID to access the in-app purchase feature.

3 You may also **Watch video advertisement** to earn a credit.

4 If you change your mind, tap **Cancel.**

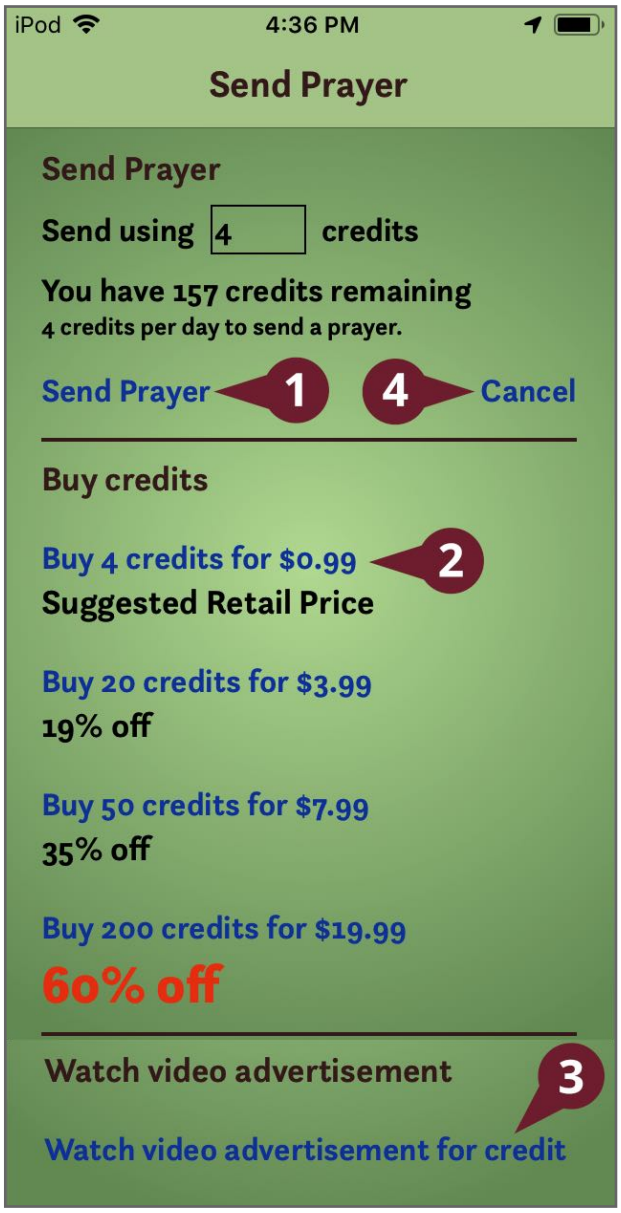

Fig. QSG-12a/UG-14a

For iPad users

These elements will appear on a pop-up dialog box rather than taking up the whole screen as on smaller devices.

After you have sent the prayer postcard, you will be able to view it. Swipe across to view the Postcard Image on the back. This will either be the image from the map, or one that you selected from your device.

How to Share a Prayer Postcard

If you like, you can **Share** a prayer postcard. This is optional.

The exact location, subject, and contents of a prayer are private, known only to you — unless and if you specifically share it with someone else via email, or post it to social media such as Twitter, Facebook, Pinterest, or Instagram).

Note: Only **Active** prayers can be shared using the standard iOS sharing mechanism.

1 To share, tap on the **Share** icon.

For iPad users

The **Share** icon will be on the far right, after the **Copy, Extend Time,** and **Edit** icons. This will then display a pop-up dialog box allowing you to control what should be shared.

Under **Share Address,** you have the option to share the address at a **Pinpoint** level (the exact address), **Nearby** (the general area) or **None** (no location information). Tap the level of detail you want to share, and the button will be highlighted in brown.

2 **“Show on map”** takes you to **Map** view — to the exact spot where the prayer postcard is located.

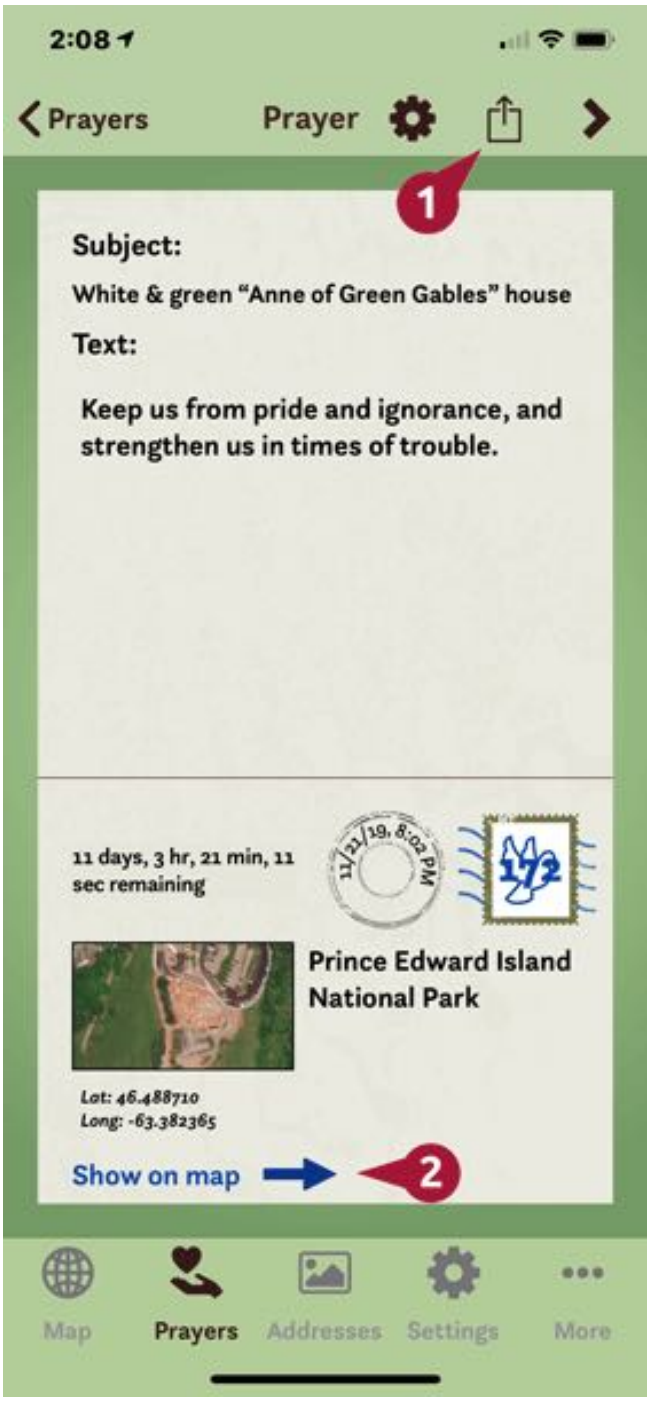

Fig. UG-20a/QSG-13a

3 You will see a series of toggles which will allow you to specify whether to share the **Subject, Prayer** text , **Image,** or **Map** of your prayer postcard. Simply toggle on (green) or off (gray) the information you want to share. (If your prayer postcard does not contain one or more of these elements, they will be disabled and automatically be set to gray.)

4 When you have set the level of detail you want to share, tap on **Share Prayer.**

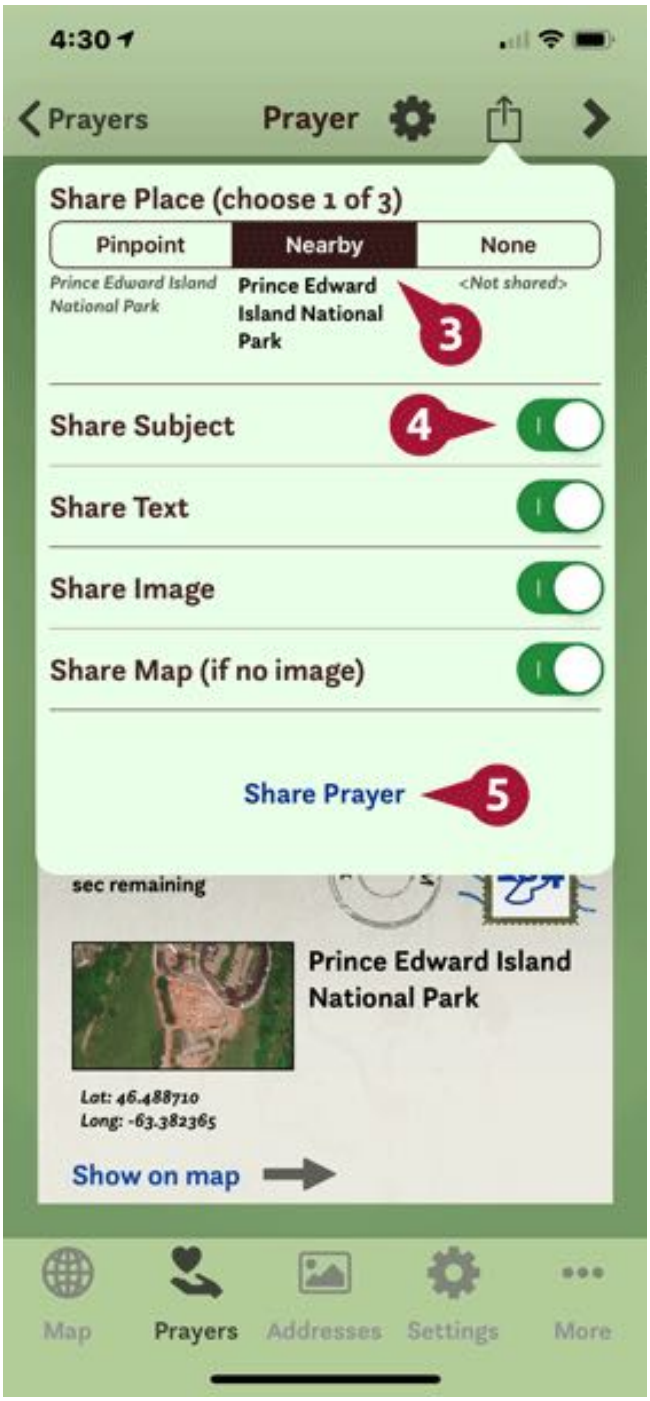

Fig. UG-20b/QSG-13b

For iPad users

The same elements will appear on a pop-up dialog box. Refer to the numbered descriptions above.

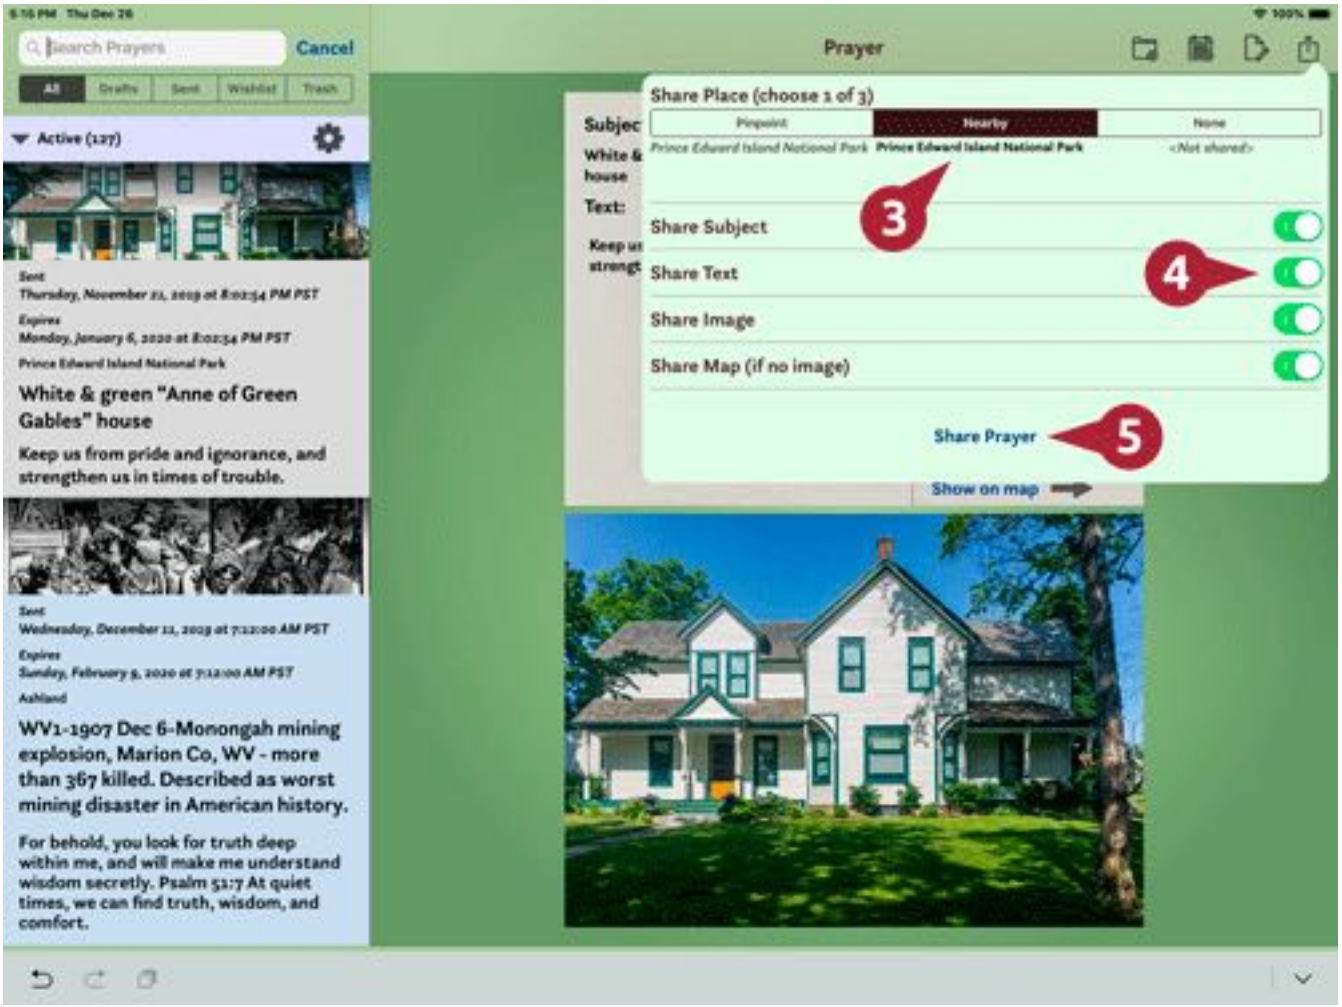

Fig. UG-20c/QSG-13c

After you tap **Share Prayer,** you are shown the standard iOS share dialog box to choose the method to share.

If you share via Mail, the items you selected to **Share** will populate your draft email. You will need to add the recipient(s) and may choose to edit the contents of the email before tapping **Send.**

Some social networks limit what can be shared. For example Facebook won't share anything the user doesn't explicitly type. When you share a prayer the shared text is also copied to the pasteboard. So when you share with social media that does not allow WherePrayer™ to pre-populate the text (such as Facebook) you can long press on the text input area and select Paste.

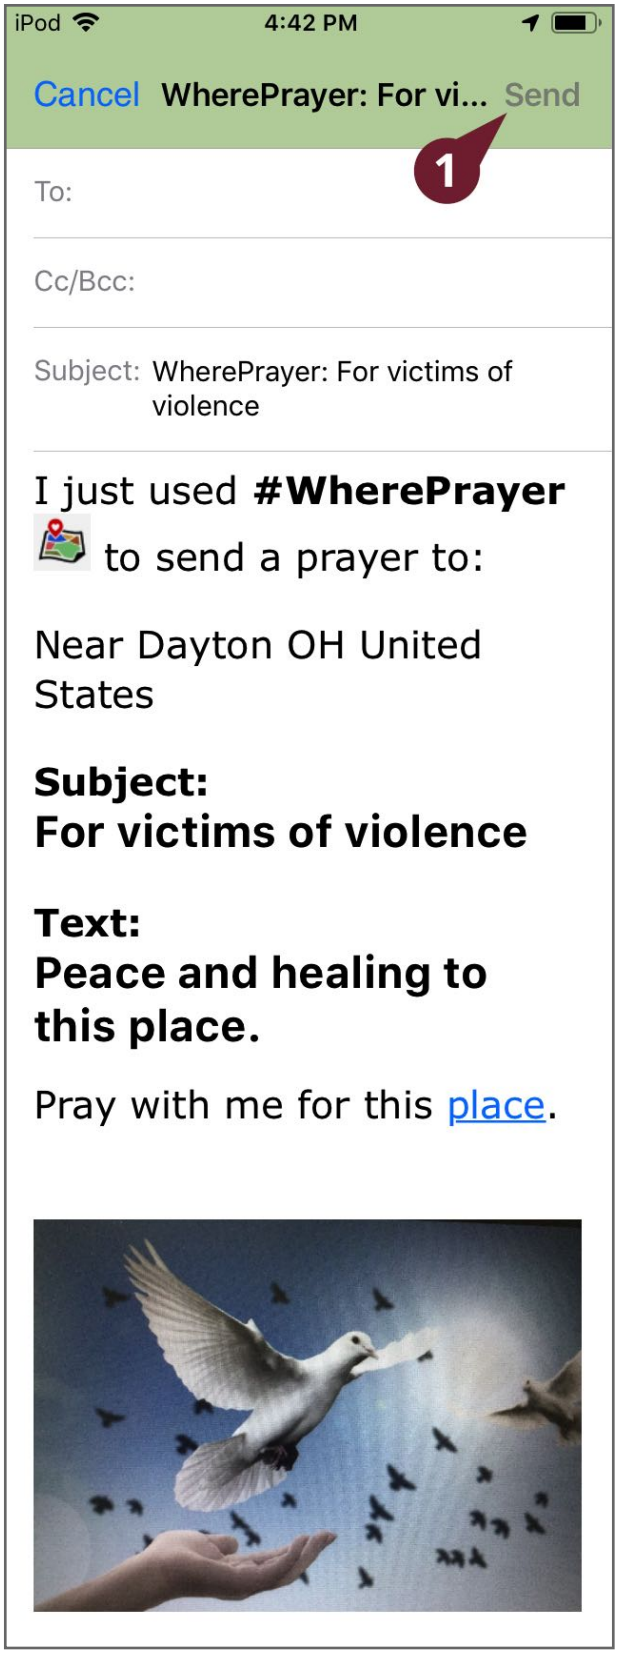

Fig. QSG-14b/UG-17b

For iPad users

The elements shown will be the same as on the iPhone or iPod touch. The scale will be different but functionality is the same so an alternate image has not been provided.

How to Organize Prayer Postcards

Prayers which are saved but not sent are stored in the **Drafts** category on the **Prayers** tab. Sent prayers are either **Active** or **Expired.**

1 After you have saved and/or sent a few prayers, you may want to organize them into **Wishlists.** You might create **Wishlists** by time period (month or season) or prayer recipients (Friends and Family, rest of the world) or any other scheme that works for you.

To move prayers to a **Wishlist,** swipe left to reveal the **Move** icon. Tap on **Move.**

Tap on **Drafts** or **Sample** prayers to move prayer to one of those Wishlists.

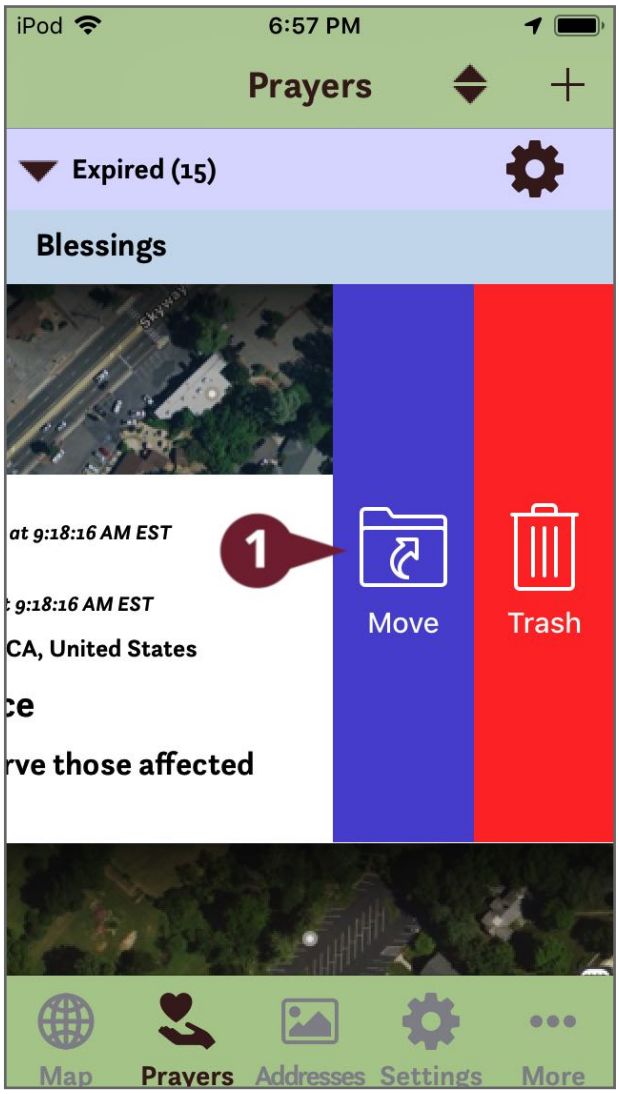

Fig. UG-18a

2 Or, create a new **Wishlist** by tapping on the + icon (plus sign).

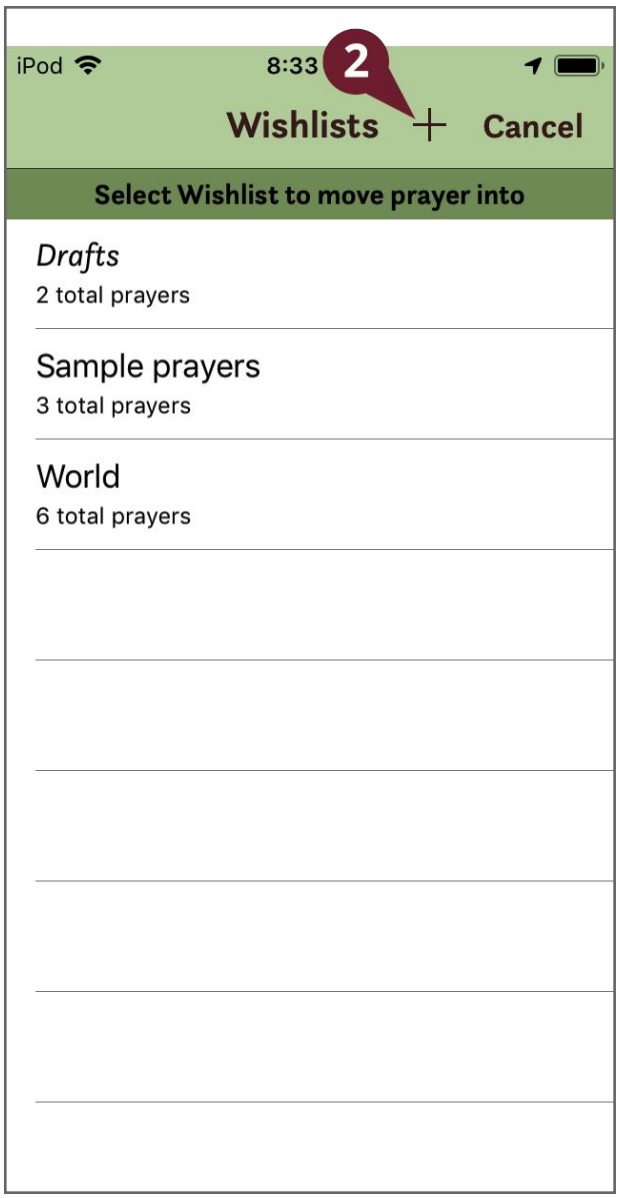

Fig. UG-18b

Enter a name for your new Wishlist and tap Create.

Wishlists must be uniquely named. The names are not case sensitive; for example “Family” and “family” will be considered as duplicate names.

Your new Wishlist will now appear in the list of Wishlists with Drafts and Sample Prayers. Select the Wishlist to move the Prayer into.

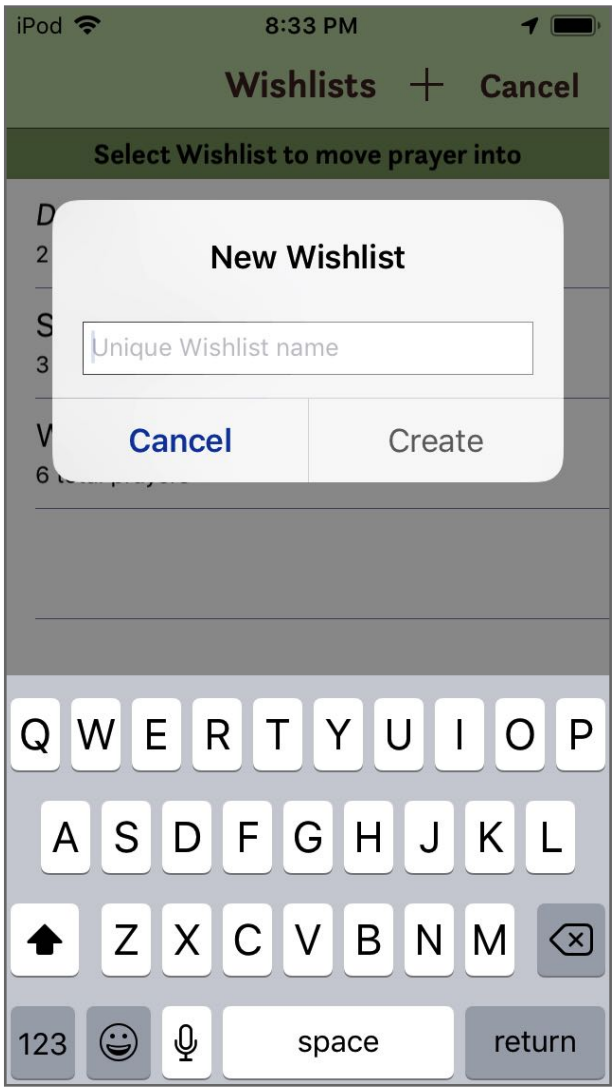

Fig. UG-18c

Opening a Prayer

1 Alternatively, tap into the white or pale blue area of the prayer to open it. (The colors alternate from prayer to prayer going down the list.) When a user selects a prayer, its background turns gray.

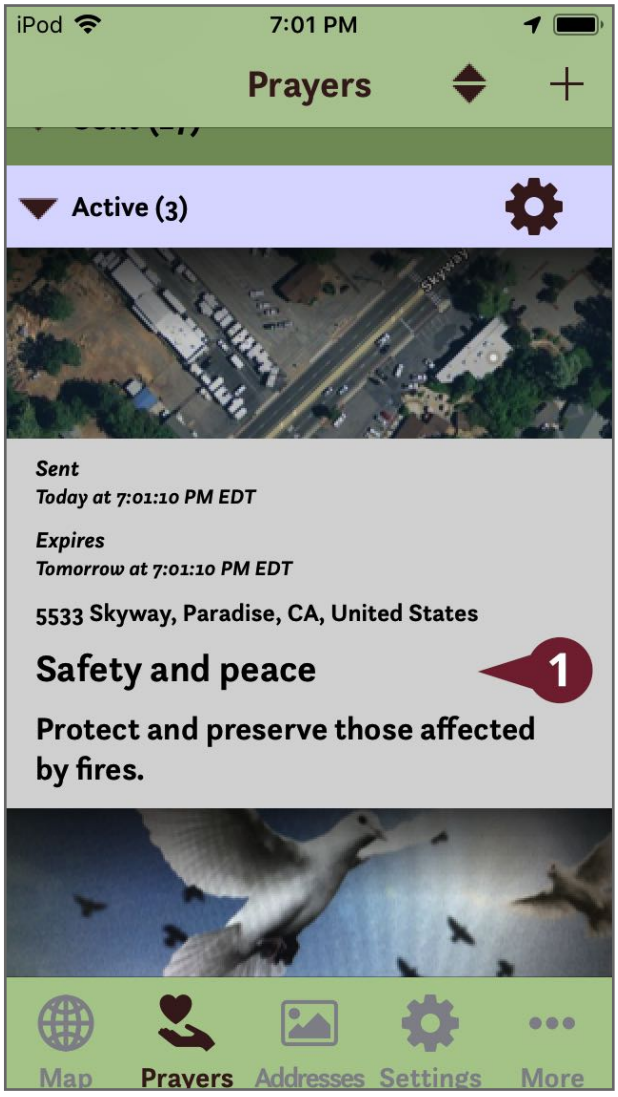

Fig. UG-18d

1 Tap on the **Gear** icon.

Fig. UG-18e

2 Tap on **Move** to move the prayer into a **Wishlist.** The interface for creating a new **Wishlist** is the same as the previous example.

More about Credits

Each WherePrayer™ user is provided with an initial number of free credits to get started. After those credits have been used to send prayers, to continue to send prayers you will need to acquire more credits.

Credits can be acquired by in-app purchase. They can also be earned by watching video ads.

As part of the prayer-sending process, you will have the opportunity to review your credit balance and either purchase credits or watch ads for credit.

1 To check on or add to credits separately from sending a prayer, go to **More > Credits** on the iPhone or iPod touch.

Fig. QSG-06a/UG-15a

2 On the iPad, tap the **Credits** icon at the bottom of the screen.

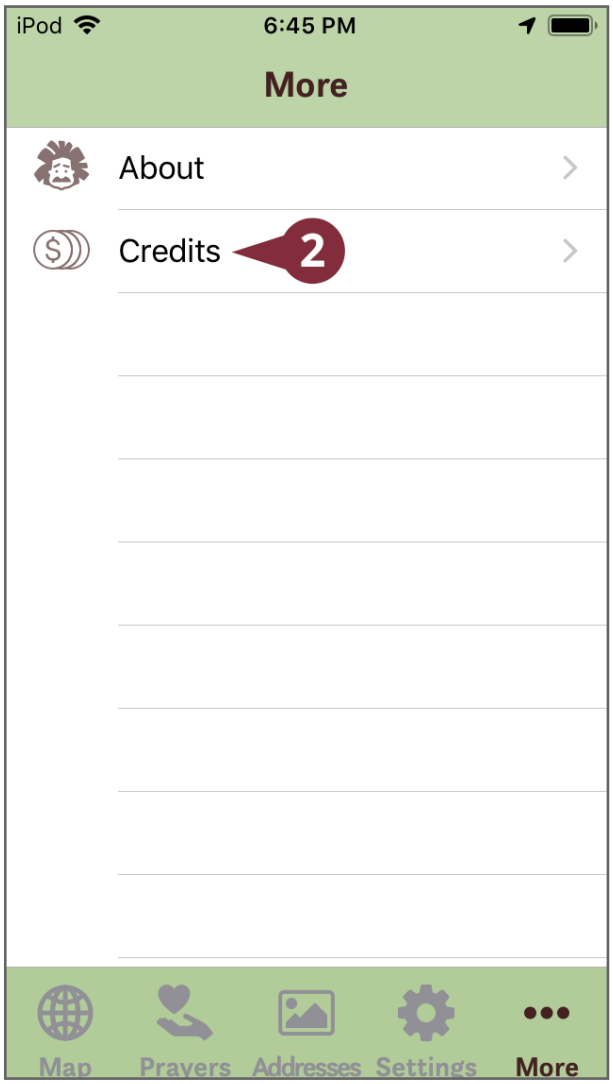

Fig. UG-15b

You will see the amount of credits you have remaining.

3 You may purchase credits from this screen. The more credits purchased at one time, the lower the cost per credit. You may be asked to log in with your Apple ID to access the in-app purchase feature.

4 You may also **Watch video advertisement** to earn a credit.

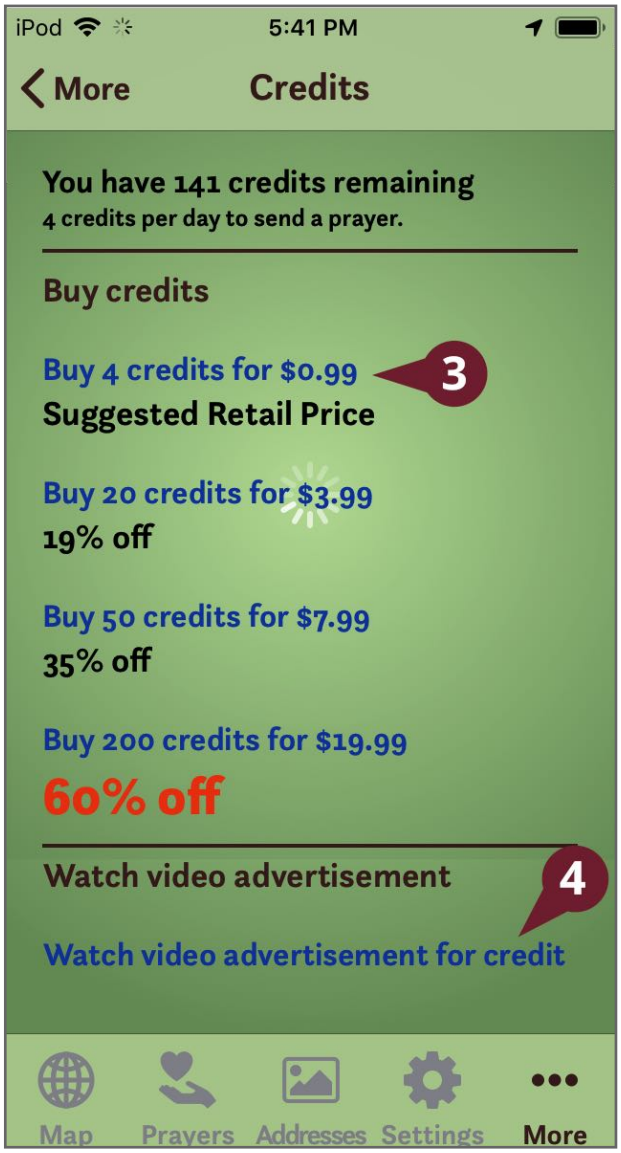

Fig. UG-15c

How to Undo Actions

Many WherePrayer™ actions are undoable by shaking your device. **Actions** which can be reversed with shaking are:

Move Address to Trash
Copy to Folder
Create WishList
Move Drafts to Trash
Move Expired prayer to Trash
Move to Folder
Rename WishList
Change Sort Order
Move to Trash

Actions which are not undoable by shaking the device will show an alert verifying that you want to complete the requested action, such as Emptying the Trash.

More about Prayer Locations

On the Map tab you will see location tags marking places currently held in prayer by WherePrayer™ users. A red location tag with one heart indicates one prayer. A blue location tag with two hearts indicates multiple prayers at locations close to one another. The number will show how many prayers are active in that location.

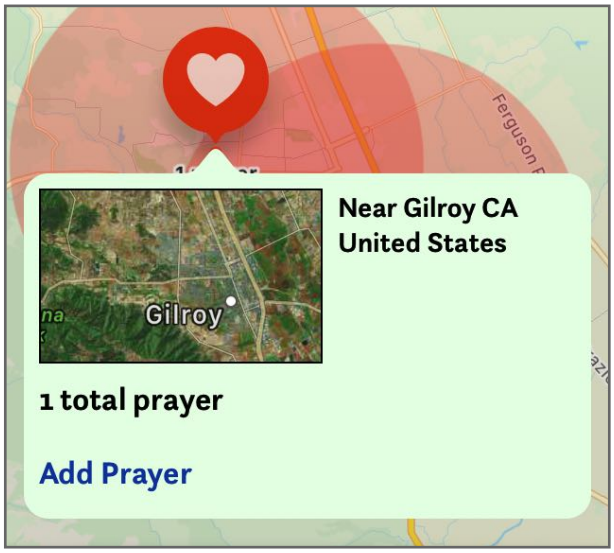

Fig. QSG-02a/UG-19a

Tap on a location tag to learn more detail about the location. Note that the exact location is not given. The location tag is randomly placed in a 5 km circle around the actual address in order to respect privacy. The exception to this is if the location is a known landmark or area of interest, such as the White House or a park. Examples of an area of interest are the name of a military base, large national park, or an attraction such as the Eiffel Tower, Disneyland, or Golden Gate Park.
